ABOUT ME

22 year-old **full-stack web developer** specialized in **JavaScript/TypeScript (React, Next.js, Node.js)** with **3 years of experience**. Passionate about data manipulation and making creative and complex applications, I'm actively **looking for a long-term job in Auvergne-Rhône-Alpes, France**.

PROFESSIONAL EXPERIENCES

ELIKYA ACADEMY Full-stack web developer

01/10/2021 - 30/09/2024

As the only developer in the company, my work was to evaluate the needs of the school's administration and make an adapted solution. From this, I realized multiple applications :

- With NextJS (Atomic design) :
 - <https://www.elikya-academy.com>
 - <https://www.formation.elikya-academy.com>
 - Extranet to allow administration to manage courses, pupils and teachers
 - Back-office / Admin panel to update contents on the different websites
- API Development (NodeJS / ExpressJS)
 - Micro-services architectures
 - Authentication, CDN, Notion API, Cloud, Media transfers, E-mails, PDFs generation, Web Sockets, ...

Through these applications, I learnt to handle other aspects of web development such as :

- Setup/creation of the whole company web architecture
- CI/CD management (CPanel, Vercel, Github Actions)
- Database management and administration (MySQL)
- Internal mobile app development (Flutter / Dart)

SCHOOL CAREER

YNOV LYON Full-stack web development Mastère

09/2021 - 09/2024

- Multiplayer online game platform (VueJS / Node / Express)
 - <https://gamerhub.lucashost.fr/>
